

jdksavdecc\_aem\_command  
\_get\_configuration\_response  
\_set\_controller\_entity\_id

```
graph LR; A["jdksavdecc_aem_command  
_get_configuration_response  
_set_controller_entity_id"] --> B["jdksavdecc_eui64_set"]
```

The diagram illustrates a dependency relationship between two Java packages. On the left, a gray rectangular box contains the package name `jdk.savdecc.aem.command` and its sub-packages `_get_configuration_response` and `_set_controller_entity_id`. A blue arrow points from this box to a white rectangular box on the right, which contains the package name `jdk.savdecc.eui64.set`. This indicates that the `jdk.savdecc.aem.command` package depends on the `jdk.savdecc.eui64.set` package.
