

```
graph RL; main[main] --> openavblntfMjpegGstInitialize[openavblntfMjpegGstInitialize];
```

Diagram illustrating a function call or relationship between two components:

The component on the left is labeled `openavblntfMjpegGstInitialize` and is highlighted with a gray background. The component on the right is labeled `main` and has a white background. A blue arrow points from `main` to `openavblntfMjpegGstInitialize`, indicating that `main` calls or interacts with `openavblntfMjpegGstInitialize`.

`main`
