

checkAllFailedAllocsWereDone

```
graph RL; TEST[TEST] --> checkAllFailedAllocsWereDone[checkAllFailedAllocsWereDone];
```

The diagram illustrates a control flow from a block labeled 'TEST' to a block labeled 'checkAllFailedAllocsWereDone'. The 'TEST' block is a white rectangle with a black border on the right side. The 'checkAllFailedAllocsWereDone' block is a gray rectangle with a black border on the left side. A blue arrow points from the 'TEST' block to the 'checkAllFailedAllocsWereDone' block, indicating a call or transition.
