

runtime_error

```
classDiagram
    class runtime_error {
    }
    class avdecc_runtime_error {
    }
    avdecc_runtime_error --|> runtime_error
```

The diagram illustrates an inheritance relationship. At the top is a class box for 'runtime_error', which is divided into three horizontal sections: the top section contains the class name, and the two bottom sections are empty. Below it is a class box for 'avdecc_runtime_error', also divided into three horizontal sections: the top section contains the class name, the middle section is empty, and the bottom section contains the text '+ avdecc_runtime_error()'. A blue arrow with an open triangular head points from the top of the 'avdecc_runtime_error' box to the bottom of the 'runtime_error' box, indicating that 'avdecc_runtime_error' inherits from 'runtime_error'.

avdecc_runtime_error

+ avdecc_runtime_error()
